Cards Against Humanity

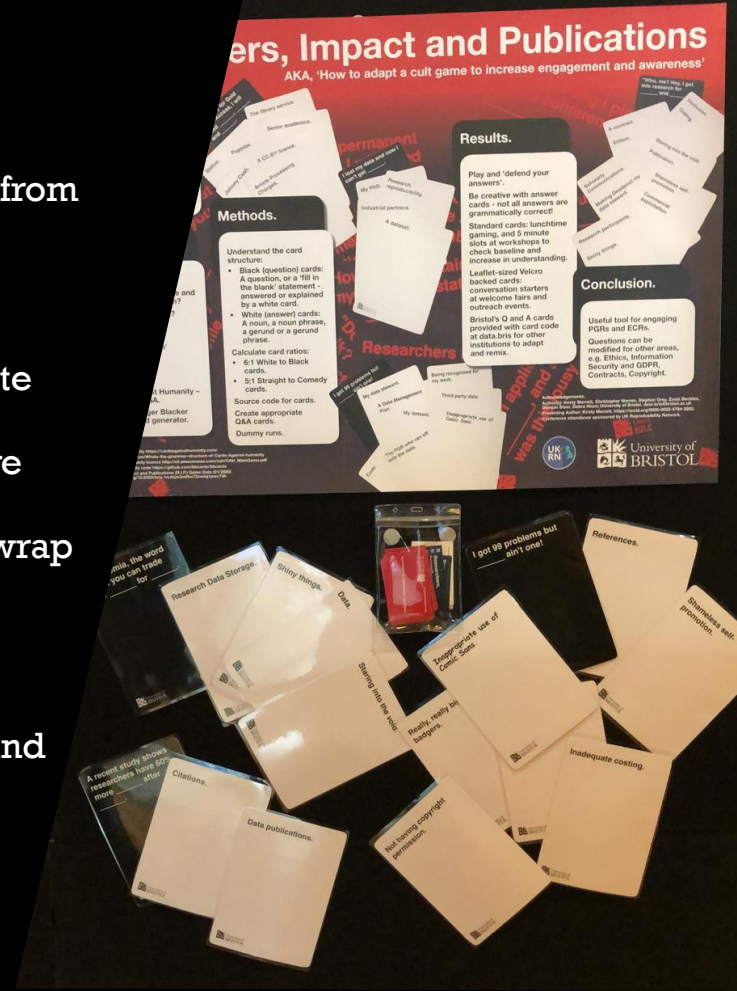

CC-BY-NC-SA

Cards Against Humanity.

A party game
for horrible people.

Game play and scenarios

- A 'card czar' asks a question, the players answer using a card from their hand
- Play and 'defend your answers'
- Ratio of straight answers to comic answers 5:1
- Comic answers are for light relief, and for when an appropriate answer is not in your hand (or, you do not know it)
- Players can be creative with answer cards – not all answers are grammatically correct!
- Standard cards, for lunchtime gaming, 5 minute ice-breaker/wrap up activities to check baseline understanding and measure improvements
- Leaflet sized Velcro backed cards, as conversation starters at welcome fairs, conferences, outreach events
- Cards provided with 'suggested' answers for each question, and card code so other institutions and teams with other functions can adapt and remix

What's holding me back right now?

What will always hold you a grant?

To get a permanent contract, I will need _____.

The best thing I picked up at a conference was _____.

The fight-bro I submitted to but all I had _____.

The best way to gain a profile is to always remember _____.

How am I maintaining my academic status?

"Do you expect _____?"

Researchers like _____.

I applied for _____ and all I got was lousy _____.

My paper was accepted by International _____.

On your score is _____.

University of BRISTOL

bea _____

need.

g up my _____
proved my _____
profile.

or, I _____
at _____

me, the most _____
ortant element of _____
early _____

ds to gr _____

thi _____
life _____
an _____

Page & colour change.
The REF.
Science.
Eating cheese before bed.
Vanity publishers.
Help from an unlikely source.
It's a scam!

Publishing in will get me more citations.
A repository.
Data repository.
Green Open Access.
Impact factor.

I left _____ on the bus, and now I haven't
A flash drive.
A research grant.

Who, me? Hey, I got into research for me!
A contract.
Elision.
Storing in Publication.
Shameful promotion.
Commonly exploited.
Research participants.
Shiny things.

Name three things you can find in a journal article.

Isambard Kingdom Brunel's big giant head.

I got 99 problems but ain't one!
My data steward.
A Data Management Plan.

My dataset.
The PGR who ran off with the data.
Code.
Being recognised for my work.
Third party data.
Inappropriate use of Comic Sans.

To quality for Gold Open Access, I will need _____.
Status.
Johnny Cash.
Puppies.
A CC-BY licence.
Article Processing Charges.
Senior academics.
The library service.

My ORCID iD.
Data Access Statement.
References.
Research metrics

My last paper looked like it wouldn't get accepted but I managed to pull out of the bag.
Open Data.
A Data Access Statement.
The DOI.

I checked my journal's data policy and I need _____
Data.
Figshare.
A readme file.
A dataset.
An Open File Format.

Publishing in will get me more citations.
A repository.
Data repository.
An open access publisher.
Green Open Access.
Impact factor.

My publisher wants my data, and I have _____
Principles.
Research Data Management.
Really, really big badgers.
An inadequate Data Management Plan.

Researchers, Impact & Publications (R.I.P.) Game data (01-2020)

Increasing researcher awareness of the importance of the links between good Research Data Management, published articles, funder requirements and the research lifecycle is a large part of a Research Support services' role. The University of Bristol's Research Data Service has adapted the cult game 'Cards Against Humanity' for a research environment.

Whilst the game demonstrated here is specific to Research Data Management and its relationship to decisions made during the research lifecycle, the mechanism allows for adaptations across multiple fields: teams in contracts, ethics, research development and data protection can also benefit by developing their own questions and using this game as strategy to reach their audience.

In addition to its use as a tool for engaging with researchers, Cards Against Humanity has openness at its core. The originators state it is 'meant to be remixed', and have issued Cards against Humanity with a CC-BY-NC-SA licence.

Alternative title R.I.P. Game - cards, instructions and literature
