

Score distributions for a particular BGC

Position of the score for the validated BGC-MF pair (red dot) within the distribution of the scores of the links between that particular BGC and all MFs, for established links (rows). The first three columns show histograms of the raw and standardised versions of the strain correlation score, as well as the IOKR score, for all links including a given BGC, with the score of the correct link indicated. The last column shows the standardised correlation score (x -axis) and IOKR score (y -axis) for the same links, again with the correct link indicated.
